Our goal in providing a dental package is to assist you, the owner, in caring for your pet's mouth before it becomes a problem such as in Stages 3 and 4 gingivitis and periodontal disease. Gingivitis and periodontal disease can affect many systems of the body and cause problems of which you may not be aware. In order to keep your pet healthy and happy, we recommend having your pet's teeth cleaned before they get to these advanced stages. (If underlying dental disease is detected, future dental procedures may be needed.)

Prices may be subject to change without notice.
